

AYESHA AKHTAR

OBJECTIVE

Aspiring MERN stack developer with a strong foundation in MongoDB, Express.js, React, and Node.js, seeking a summer internship to leverage technical skills and gain hands-on experience. Passionate about contributing to innovative projects, collaborating with experienced professionals, and enhancing my expertise in a dynamic and challenging environment.

- **UMT**
2021-2025
BS(SE)
3.75

PROJECTS

- **Text Utility application**
Developed a React-based text utility tool with features like word and character count, whitespace removal, text conversion (uppercase, lowercase, capitalization), and text copying. Utilized React, JavaScript, HTML, and CSS to create a user-friendly interface, enhancing user efficiency in text manipulation tasks.
- **To-Do List project**
Developed a dynamic to-do list application using React, featuring add, edit, and delete functionalities. Implemented local storage to ensure tasks persist across page refreshes, enhancing user convenience and experience. Utilized React, JavaScript, HTML, and CSS for development.
- **User-Admin Interaction website**
Developed a full-featured MERN stack website with separate user and admin functionalities. The website includes signup, login, home, about, and service pages for regular users, who can also submit contact forms. For administrators, the platform provides detailed views of all users and their contact messages, stored securely in a MongoDB database. This setup allows normal users to explore the website and reach out via the contact form, while administrators can monitor user activities and manage contact information efficiently. Technologies used include MongoDB, Express.js, React, and Node.js.
